E+ Capacity Building in Higher Education

SEA-ABT: SOUTH EAST ASIA ACADEMY FOR BEVERAGE TECHNOLOGY

Project number: 561515-EPP-1-2015-1-AT-EPPKA2-CBHE-JP October 2015-September 2018

Deliverable D6.3

Joint EU-SEA-ABT Academy web platform

Prepared by: Anita Habershuber & Line Lindner (IFA)

Contributors: Suesut Taweepol (KMITL) & Ulaiwan Withayagiat (KU)

Delivery date: M39

Dissemination Level			
PU	Public	Х	
PP	Restricted to other programme participants (including Commission services and projects reviewers)		
СО	Confidential, only for members of the consortium (including EACEA and		
	Commission services and projects reviewers)		

Summary:

This deliverable D6.3 – Joint EU-SEA-ABT Academy web platform describes the main functionalities of the web platform with its interactive tools – the e-learning platform, Digital Library, Brokerage System, Mobility System, Information Collection System and the Experts Database with the project website.

Contents

1	Overview of the tools	. 3
2	Digital Library	. 4
3	Brokerage System	. 5
4	Mobility Database	. 7
5	E-learning platform	. 9
6	Experts Database	10
7	Information Collection System 1	L1

1 Overview of the tools

On https://www.sea-abt.eu/tools all tools have been collected. Below each of the tools are described.

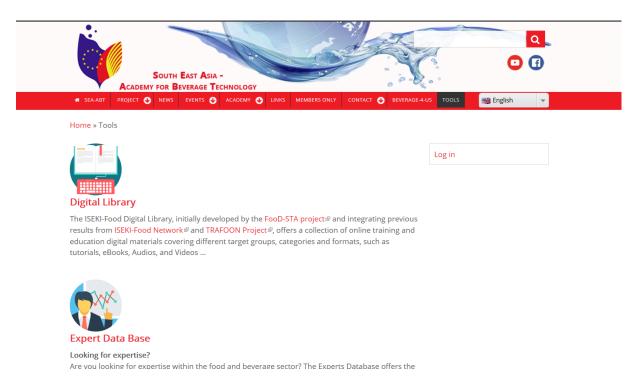

Figure 1: Screenshot https://www.sea-abt.eu/tools

2 Digital Library

The <u>ISEKI-Food Digital Library</u> – initially developed by the EuFooD-STA project – offers a collection of digital teaching materials covering different target groups, categories and formats such as tutorials, eBooks, audios, videos etc. You can search for materials by applying various filters:

- target groups (e.g. students, trainers and teachers...)
- sector (e.g. beverage, fruits and vegetables, education and training...)
- category (e.g. biotechnology, hygienic design...)
- language (e.g. English, Thai...)
- training formats (PDF file, webinar, audio, video...)

While the Digital Library contains entries from several EU-projects, it is also possible to filter for entries related only to the SEA-ABT project.

3 Brokerage System

The <u>SEA-ABT Brokerage System</u> is a contact platform for graduates and the food and beverage sector providing offered job opportunities, on the one side, and available graduates (expertise) on the other side.

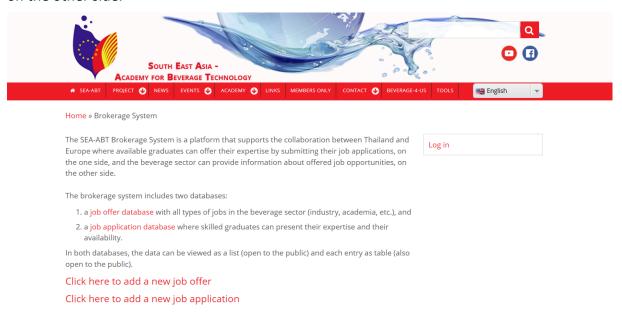

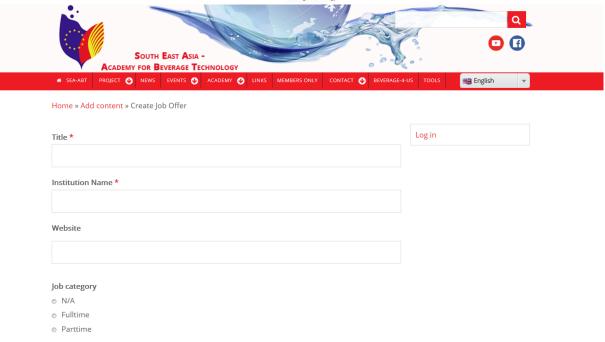

Figure 3: screenshot https://www.sea-abt.eu/brokerage-select

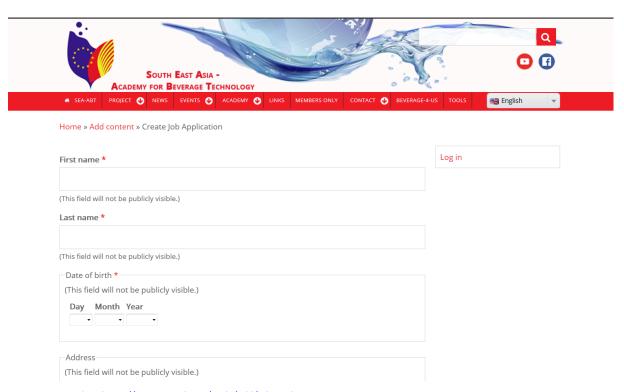

The brokerage system includes two databases:

- (1) a job offer database with all types of jobs in the food and beverage sector (industry, academia, etc.), and
- (2) a job application database where skilled graduates can present their expertise and their availability.

Type of institution

4 Mobility Database

The SEA-ABT Mobility Database is a platform for students and industry/university staff from the beverage sector in Thailand and Europe.

The Mobility Database acts as a contact base to inform and facilitate the exchange of students and staff between the beverage sector and universities (internships, short term scientific missions (STSM)) internationally. In the Database, we distinguish between 3 types of mobility offers:

- STUDENT MOBILITY: Training of students in the food and beverage sector is essential to
 develop adequate and professional competences giving graduates the possibility to
 enter the job market with a good performance. Internationalization of student
 education is also necessary to improve students' competences and an effective way to
 prepare graduates working in an international environment.
- TEACHER MOBILITY: Teacher mobility in industry for short term scientific missions (STSM) is important to enable teaching staff to understand and update them on industry needs in education and research, which at the same time may provide an opportunity for faster technology transfer, especially to SMEs. These STSMs are an important step further for the improvement of the industry-university collaboration.
- INDUSTRY STAFF MOBILITY: Short term scientific missions (STSM) of industry staff in universities is important to update the industry with new methods and technologies, which may provide an opportunity for faster technology transfer, especially to SMEs.

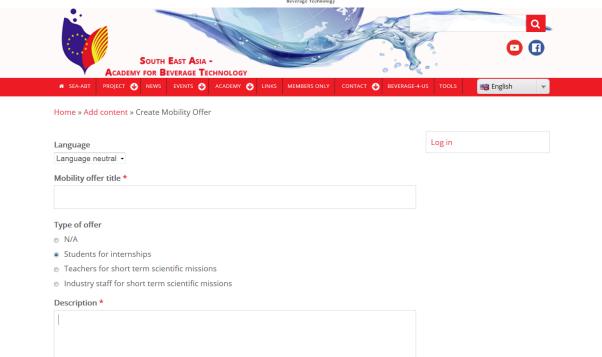

Figure 7: screenshot https://www.sea-abt.eu/node/add/mobility-offer

5 E-learning platform

Under the hospice of the ISEKI-Food and ISEKI Mundus projects, e-learning courses were developed for undergraduate-, graduate students and industrial people.

At this point, two e-learning courses have been developed on the topics:

- · Hazards in hygienic processing
- Beverage technology II: brewing technology

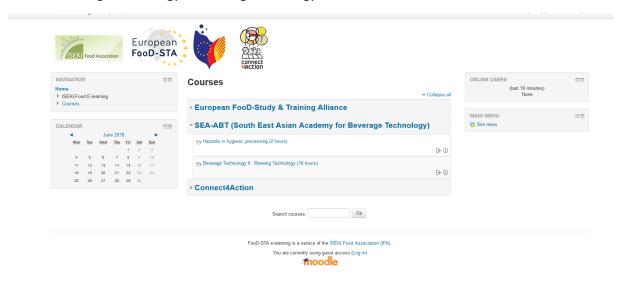

Figure 8: Screenshot https://moodle.iseki-food.net/

6 Experts Database

The Experts Database offers the opportunity to search for specific expertise:

- within a certain product related sector (e.g. fish, dairy, ...)
- and/or a certain categories (e.g. quality and safety, engineering, food law, ..)
- for keywords related to expertise, methods, equipment and services.

Figure 9: Screenshot https://db.iseki-food.net/database/expert

7 Information Collection System

SEA-ABT is focused on developing demand-driven modules and related educational products for the use in CPD and academic education in the area of beverage technology. For that reason, we welcome contributions to our **Information Collection System.** You can do so by:

- Filling in the short online "Questionnaire about competences and skills needed in the beverage industry"_(mainly for staff who work in the Thai food industry, especially in the beverage industry) OR
- Filling in one of the questionnaires (word files) below:
 - Questionnaire on beverage technology curriculum development (mainly for staff at Thai universities and research institutes)
 - Specific Survey: Questionnaire on needs of the beverage industry (mainly for staff who work in the Thai food industry, especially in the beverage industry) returned to BeverageTechnology.Thailand@gmail.com

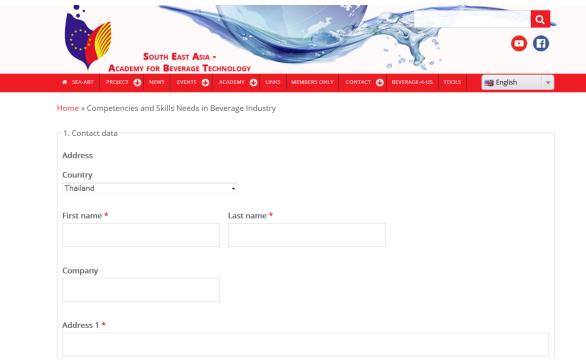

Figure 10: Screenshot questionnaire https://www.sea-abt.eu/questionnaire-competencies-skills-beverage-industry

As an aid, also a short summary of the main findings of the surveys (WP1) collecting information on available teaching capacities and identified needs for courses and modules within HE and CPD.

Summary of the SEA-ABT surveys collecting information on available teaching capacities and identified needs for courses and modules within Higher Education (HE) and Continual Professional Development (CPD)
